Biotechnology of Filamentous Fungi: Technology and Products (The Biotechnology Series) Author Unknown

Biotechnology of Filamentous Fungi: Technology and Products provides a comprehensive discussion of the molecular biology, genetics, and biochemistry of filamentous fungi. It also deals with general principles of biochemical engineering such as process design and scaleup. The book's main emphasis, however, is on the commercial significance of filamentous fungi.

The book highlights the unique aspects of filamentous fungi along with those aspects common to most microorganisms studied in industries that use biotechnology. Filamentous fungi can generate a wide range of industrial products including primary metabolites such as organic acids, secondary metabolites such as β -lactam antibiotics, nonantibiotic drugs, and enzymes for use in food production. Whole organisms such as mushrooms can be used as well as organisms used as insecticides and herbicides. Filamentous fungi also qualify as potential hosts for the secretion of certain heterogeneous proteins such as mammalian proteins. However, not all things related to fungi are beneficial. Mycotoxins products by fungi can be lethal to humans; there is also a need to develop antifungal agents to destroy fungi that can kill animals and plants. These topics are important aspects of the biotechnology of filamentous fungi and are dealt with in this text.

From reader reviews:

Lisa Jennings:

The book untitled Biotechnology of Filamentous Fungi: Technology and Products (The Biotechnology Series) is the reserve that recommended to you to learn. You can see the quality of the publication content that will be shown to you. The language that article author use to explained their way of doing something is easily to understand. The article author was did a lot of exploration when write the book, so the information that they share for you is absolutely accurate. You also might get the e-book of Biotechnology of Filamentous Fungi: Technology and Products (The Biotechnology Series) from the publisher to make you considerably more enjoy free time.

Harold Riggs:

The reason why? Because this Biotechnology of Filamentous Fungi: Technology and Products (The Biotechnology Series) is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will shock you with the secret that inside. Reading this book adjacent to it was fantastic author who have write the book in such awesome way makes the content inside of easier to understand, entertaining method but still convey the meaning totally. So , it is good for you because of not hesitating having this anymore or you going to regret it. This book will give you a lot of positive aspects than the other book have got such as help improving your skill and your critical thinking way. So , still want to hesitate having that book? If I ended up you I will go to the guide store hurriedly.

Leon Fisher:

Do you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Aim to pick one book that you find out the inside because don't assess book by its deal with may doesn't work the following is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside seem likes. Maybe you answer can be Biotechnology of Filamentous Fungi: Technology and Products (The Biotechnology Series) why because the excellent cover that make you consider in regards to the content will not disappoint a person. The inside or content is fantastic as the outside or cover. Your reading 6th sense will directly assist you to pick up this book.

Darren Perez:

A lot of reserve has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the most effective book for you, science, comic, novel, or whatever by means of searching from it. It is named of book Biotechnology of Filamentous Fungi: Technology and Products (The Biotechnology Series). You'll be able to your knowledge by it. Without causing the printed book, it might add your knowledge and make anyone happier to read. It is most important that, you must aware about publication. It can bring you from one place to other place.
