Building Bioinformatics Solutions: with Perl, R and MySQL Conrad Bessant, Ian Shadforth, Darren Oakley

Modern bioinformatics encompasses a broad and ever-changing range of activities involved with the management and analysis of data from molecular biology experiments. Despite the diversity of activities and applications, the basic methodology and core tools needed to tackle bioinformatics problems is common to many projects. Building Bioinformatics Solutions provides a comprehensive introduction to this methodology, explaining how to acquire and use the most popular development tools, how to apply them to build processing pipelines, and how to make the results available through visualizations and web-based services for deployment either locally or via the Internet. The main development tools covered in this book are the MySQL database management system, the Perl programming language, and the R language for statistical computing. These industry standard open source tools form the core of many bioinformatics projects, both in academia and industry. The methodologies introduced are platform independent, and all the examples that feature have been tested on Windows, Linux and Mac OS. This advanced textbook is suitable for graduate students and researchers in the life sciences who wish to automate analyses or create their own databases and web-based tools. No prior knowledge of software development is assumed. Having worked through the book, the reader should have the necessary core skills to develop computational solutions for their specific research programmes. The book will also help the reader overcome the inertia associated with penetrating this field, and provide them with the confidence and understanding required to go on to develop more advanced bioinformatics skills.

From reader reviews:

Marie Griffin:

As people who live in the particular modest era should be upgrade about what going on or data even knowledge to make these individuals keep up with the era that is certainly always change and make progress. Some of you maybe will probably update themselves by examining books. It is a good choice for you personally but the problems coming to you is you don't know what type you should start with. This Building Bioinformatics Solutions: with Perl, R and MySQL is our recommendation so you keep up with the world. Why, since this book serves what you want and wish in this era.

Kristi Goins:

Spent a free time and energy to be fun activity to perform! A lot of people spent their free time with their family, or their very own friends. Usually they accomplishing activity like watching television, about to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your personal free time/ holiday? Can be reading a book might be option to fill your free time/ holiday. The first thing that you will ask may be what kinds of publication that you should read. If you want to consider look for book, may be the publication untitled Building Bioinformatics Solutions: with Perl, R and MySQL can be good book to read. May be it might be best activity to you.

Reva Morison:

Reading can called imagination hangout, why? Because if you find yourself reading a book particularly book entitled Building Bioinformatics Solutions: with Perl, R and MySQL your brain will drift away trough every dimension, wandering in most aspect that maybe unidentified for but surely might be your mind friends. Imaging just about every word written in a book then become one form conclusion and explanation that maybe you never get previous to. The Building Bioinformatics Solutions: with Perl, R and MySQL giving you another experience more than blown away the mind but also giving you useful details for your better life in this particular era. So now let us present to you the relaxing pattern the following is your body and mind are going to be pleased when you are finished studying it, like winning a sport. Do you want to try this extraordinary investing spare time activity?

Marvin Smith:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from your book. Book is composed or printed or descriptive from each source in which filled update of news. With this modern era like at this point, many ways to get information are available for an individual. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just seeking the Building Bioinformatics Solutions: with Perl, R and MySQL when you necessary it?
