Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture Ravi Das

Most biometric books are either extraordinarily technical for technophiles or extremely elementary for the lay person. Striking a balance between the two, **Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture** is ideal for business, IT, or security managers that are faced with the task of making purchasing, migration, or adoption decisions. It brings biometrics down to an understandable level, so that you can immediately begin to implement the concepts discussed.

Exploring the technological and social implications of widespread biometric use, the book considers the science and technology behind biometrics as well as how it can be made more affordable for small and medium-sized business. It also presents the results of recent research on how the principles of cryptography can make biometrics more secure.

Covering biometric technologies in the cloud, including security and privacy concerns, the book includes a chapter that serves as a "how-to manual" on procuring and deploying any type of biometric system. It also includes specific examples and case studies of actual biometric deployments of localized and national implementations in the U.S. and other countries.

The book provides readers with a technical background on the various biometric technologies and how they work. Examining optimal application in various settings and their respective strengths and weaknesses, it considers ease of use, false positives and negatives, and privacy and security issues. It also covers emerging applications such as biocryptography.

Although the text can be understood by just about anybody, it is an ideal resource for corporate-level executives who are considering implementing biometric technologies in their organizations.

From reader reviews:

Yolanda Osuna:

Book will be written, printed, or created for everything. You can know everything you want by a reserve. Book has a different type. As we know that book is important matter to bring us around the world. Beside that you can your reading proficiency was fluently. A book Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture will make you to be smarter. You can feel far more confidence if you can know about almost everything. But some of you think that open or reading the book make you bored. It isn't make you fun. Why they are often thought like that? Have you in search of best book or suitable book with you?

Anna Yates:

The book Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture can give more knowledge and information about everything you want. Exactly why must we leave the good thing like a book Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture? Several of you have a different opinion about publication. But one aim that book can give many facts for us. It is absolutely appropriate. Right now, try to closer with your book. Knowledge or facts that you take for that, it is possible to give for each other; you may share all of these. Book Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture has simple shape however you know: it has great and large function for you. You can search the enormous world by open and read a e-book. So it is very wonderful.

Lillian Carlucci:

A lot of e-book has printed but it is unique. You can get it by world wide web on social media. You can choose the most beneficial book for you, science, comedian, novel, or whatever simply by searching from it. It is identified as of book Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture. Contain your knowledge by it. Without departing the printed book, it can add your knowledge and make you actually happier to read. It is most critical that, you must aware about guide. It can bring you from one destination to other place.

Dean Green:

Some individuals said that they feel uninterested when they reading a publication. They are directly felt this when they get a half elements of the book. You can choose the particular book Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture to make your current reading is interesting. Your own skill of reading skill is developing when you like reading. Try to choose very simple book to make you enjoy to read it and mingle the opinion about book and examining especially. It is to be first opinion for you to like to start a book and go through it. Beside that the book Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture can to be your new friend when you're feel alone and confuse in what must you're doing of the time.
