Enterprise Technology for Private Equity: How to Plan, Design and Execute a Business Transformation Programme using Strategic IT Solutions Ankur Agarwal, Monish Singhal, Jim Kouris

With the private equity industry facing new pressures – from investors demanding more in-depth data reporting to greater regulatory scrutiny – fund management firms must ensure their business is robust enough to adapt. Investing in the right technology is paramount to building an integrated business environment that is responsive to the pressures and challenges of a constantly evolving global marketplace.

Enterprise Technology for Private Equity presents a methodological approach to planning and executing a business transformation programme, making optimal use of IT systems to enable and support changes to key processes and functions to enhance client services.

Primarily written by Ankur Agarwal this is a vital resource for any private equity professional charged with, or involved in, developing a roadmap for change and making strategic IT and business decisions.
