Raspberry Pi Home Automation with Arduino Andrew K. Dennis

In Detail

Low-cost and high-performing, with a massively diverse range of uses and applications, the Raspberry Pi is set to revolutionize the way we think about computing and programming. By combining the Raspberry Pi with an Arduino board you'll be able to revolutionize the way you interact with your home and become part of a rapidly growing group of hobbyists and enthusiasts.

This essential reference will guide you through a series of exciting projects that will allow you to automate your very own home. With easy-to-follow, step-by-step examples, diagrams, and explanations you will not only find it incredibly productive but also highly engaging and informative.

Assuming no prior knowledge, our detailed practical examples will guide you through building hardware and software solutions using the Raspberry Pi and Arduino. You will learn how you can use thermistors and relays to keep cool and stay in the shade whilst also utilizing electrical motors and photoresistors. These meticulously designed tutorials will form the basis of automating your entire home and getting you started with dozens of potential projects.

Approach

"Raspberry Pi Home Automation with Arduino" is an easy-to-follow yet comprehensive guide for automating your home using the revolutionary ARM GNU/Linux board.

Who this book is for

Even if you have no prior experience with the Raspberry Pi or home automation you can pick up this book and develop these amazing projects. Full of detailed step-by-step instructions, diagrams, and images this essential guide allows you to revolutionize the way you interact with your home. If you don't know where to start, then this is the perfect book for you.

From reader reviews:

Tonya Deschamps:

Book is actually written, printed, or highlighted for everything. You can recognize everything you want by a book. Book has a different type. As you may know that book is important factor to bring us around the world. Adjacent to that you can your reading skill was fluently. A guide Raspberry Pi Home Automation with Arduino will make you to become smarter. You can feel more confidence if you can know about every little thing. But some of you think which open or reading the book make you bored. It is not make you fun. Why they are often thought like that? Have you searching for best book or appropriate book with you?

Susan Tarin:

Hey guys, do you wishes to finds a new book to read? May be the book with the headline Raspberry Pi Home Automation with Arduino suitable to you? Often the book was written by popular writer in this era. The book untitled Raspberry Pi Home Automation with Arduinois the one of several books this everyone read now. This kind of book was inspired a lot of people in the world. When you read this guide you will enter the new age that you ever know ahead of. The author explained their idea in the simple way, and so all of people can easily to understand the core of this e-book. This book will give you a lot of information about this world now. In order to see the represented of the world with this book.

Ernie Fleishman:

People live in this new morning of lifestyle always try to and must have the free time or they will get wide range of stress from both way of life and work. So , when we ask do people have spare time, we will say absolutely yes. People is human not just a robot. Then we request again, what kind of activity have you got when the spare time coming to a person of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative inside spending your spare time, typically the book you have read is usually Raspberry Pi Home Automation with Arduino.

Mark Carlton:

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or even make summary for some book, they are complained. Just minor students that has reading's internal or real their interest. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that looking at is not important, boring and can't see colorful photos on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Raspberry Pi Home Automation with Arduino can make you really feel more interested to read.
