**Theory of Hypergeometric Functions (Springer Monographs in Mathematics)** Kazuhiko Aomoto, Michitake Kita

This book presents a geometric theory of complex analytic integrals representing hypergeometric functions of several variables. Starting from an integrand which is a product of powers of polynomials, integrals are explained, in an open affine space, as a pair of twisted de Rham cohomology and its dual over the coefficients of local system. It is shown that hypergeometric integrals generally satisfy a holonomic system of linear differential equations with respect to the coefficients of polynomials and also satisfy a holonomic system of linear difference equations with respect to the exponents. These are deduced from Grothendieck-Deligne's rational de Rham cohomology on the one hand, and by multidimensional extension of Birkhoff's classical theory on analytic difference equations on the other.

### **From reader reviews:**

#### **John Harris:**

Hey guys, do you desire to find a new book you just read? Maybe the book with the name Theory of Hypergeometric Functions (Springer Monographs in Mathematics) suitable to you? The book was written by well-known writer in this era. The book entitled Theory of Hypergeometric Functions (Springer Monographs in Mathematics) is a single of several books this everyone read now. This specific book was inspired a lot of people in the world. When you read this book you will enter the new way of measuring that you ever know before. The author explained their strategy in the simple way, and so all of people can easily to understand the core of this reserve. This book will give you a lot of information about this world now. To help you see the represented of the world with this book.

#### **Jacqueline Harding:**

A lot of people always spent their particular free time to vacation as well as go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent they will free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity here is look different you can read any book. It is really fun in your case. If you enjoy the book that you just read you can spent all day long to reading a publication. The book Theory of Hypergeometric Functions (Springer Monographs in Mathematics) it is rather good to read. There are a lot of folks that recommended this book. These people were enjoying reading this book. Should you did not have enough space to deliver this book you can buy often the e-book. You can more simply to read this book from your smart phone. The price is not too costly but this book provides high quality.

#### **Mark Miller:**

Don't be worry for anyone who is afraid that this book can filled the space in your house, you will get it in e-book way, more simple and reachable. This specific Theory of Hypergeometric Functions (Springer Monographs in Mathematics) can give you a lot of buddies because by you investigating this one book you have thing that they don't and make anyone more like an interesting person. This book can be one of a step for you to get success. This reserve offer you information that might be your friend doesn't recognize, by knowing more than different make you to be great folks. So , why hesitate? Let me have Theory of Hypergeometric Functions (Springer Monographs in Mathematics).

#### **Louis Gayman:**

Some people said that they feel bored stiff when they reading a reserve. They are directly felt that when they get a half parts of the book. You can choose the actual book Theory of Hypergeometric Functions (Springer Monographs in Mathematics) to make your personal reading is interesting. Your current skill of reading talent is developing when you similar to reading. Try to choose straightforward book to make you enjoy to read it and mingle the opinion about book and reading especially. It is to be 1st opinion for you to like to

open up a book and learn it. Beside that the publication Theory of Hypergeometric Functions (Springer Monographs in Mathematics) can to be your brand new friend when you're feel alone and confuse with what must you're doing of their time.
