WiMAX: Taking Wireless to the MAX (Informa Telecoms & Media) Deepak Pareek

With market value expected to reach \$5 billion by 2007 and the endorsement of some of the biggest names in telecommunications, World Interoperability for Microwave Access (WiMAX) is poised to change the broadband wireless landscape. But how much of WiMAX's touted potential is merely hype? Now that several pre-WiMAX networks have been deployed, what are the operators saying about QoS and ROI? How and when will device manufacturers integrate WiMAX into their products? What is the business case for using WiMAX rather than any number of other established wireless alternatives?

WiMAX: Taking Wireless to the MAX examines the evolution of wireless, broadband, and the wireless broadband landscape with exhaustive coverage of technological advances and evolving topologies. It sets the tone for the journey towards untouched wireless heights - WiMAX. The author builds a complete understanding of Broadband Wireless Access (BWA) Technologies, elaborating on past developments, present needs and uses, and future trends and markets. He lays out a road map to the future and articulates present and future applications and models of BWA with focus on WiMAX. The book also provides a detailed discussion on the advanced technologies central to the existence of WiMAX. It presents strategies for building the case for WiMAX and achieving success for the different players, including service providers and equipment manufacturers.

An increasing demand for access to information anytime, anywhere has led to explosive growth in access and wireless technologies. The trend has created new competitive threats as well as new opportunities in every walk of life. The task, then, is to turn possibilities into realities and provide solutions that enable anywhere, anytime access to information and applications at low cost and with a small investment. Taking a coherent and fact-based approach, this book explores the space between what is known and available and what industry needs.

From reader reviews:

Karen Johnson:

Spent a free time and energy to be fun activity to perform! A lot of people spent their sparetime with their family, or all their friends. Usually they carrying out activity like watching television, about to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Might be reading a book may be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to test look for book, may be the e-book untitled WiMAX: Taking Wireless to the MAX (Informa Telecoms & Media) can be very good book to read. May be it could be best activity to you.

Patrick Richards:

People live in this new morning of lifestyle always aim to and must have the extra time or they will get lots of stress from both daily life and work. So , whenever we ask do people have extra time, we will say absolutely of course. People is human not really a huge robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to you of course your answer can unlimited right. Then do you ever try this one, reading publications. It can be your alternative within spending your spare time, the particular book you have read is usually WiMAX: Taking Wireless to the MAX (Informa Telecoms & Media).

Lisa Saxon:

WiMAX: Taking Wireless to the MAX (Informa Telecoms & Media) can be one of your starter books that are good idea. Many of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in vocab, easy to understand, bit entertaining however delivering the information. The author giving his/her effort that will put every word into joy arrangement in writing WiMAX: Taking Wireless to the MAX (Informa Telecoms & Media) but doesn't forget the main point, giving the reader the hottest as well as based confirm resource information that maybe you can be one of it. This great information can easily drawn you into brand new stage of crucial considering.

Clara Radtke:

As a pupil exactly feel bored to reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just very little students that has reading's spirit or real their passion. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring and can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this WiMAX: Taking Wireless to the MAX (Informa Telecoms & Media) can make you truly feel more interested to read.
