## **Commonsense Paediatrics** M. Pollak, John Fry

As 'seasoned campaigners' we offer our readers more than 60 joint practice years of commonsense experience on children and their problems. Child care is a large and fascinating part of general family practice. More than any other discipline it is a mix of understanding the wide range of normal and abnormal development, of skilful diagnosis and treatment of treatable conditions, of long-term care for handicapped children, and of organizing and carrying out prevention. For all this and more the physician has to rely on sound knowledge and understanding of the child, parents, family, social and community conditions, available services and the likely natural history of the condition - and to dispense all this with humanity, sense and sensibility. We have divided the book logically into 6 sections: (1) Factual background. (2) Universal problems of behaviour and development. (3) Common clinical disorders, so frequent and yet often so difficult to manage. (4) Social, family and community factors that create and influence many problems of childhood. (5) How to use available services and resources with discrimination and sensitivity. (6) The importance of understanding and managing the whole child. We have no single group of readers in mind. We hope that our views will be appreciated, for example, by parents, nurses, health visitors, general practitioners, community physicians and paediatricians - in fact all who care for children.
