The National Science Foundation funded a synthesis study on the status, contributions, and future direction of discipline-based education research (DBER) in physics, biological sciences, geosciences, and chemistry. DBER combines knowledge of teaching and learning with deep knowledge of discipline-specific science content. It describes the discipline-specific difficulties learners face and the specialized intellectual and instructional resources that can facilitate student understanding.

*Discipline-Based Education Research* is based on a 30-month study built on two workshops held in 2008 to explore evidence on promising practices in undergraduate science, technology, engineering, and mathematics (STEM) education. This book asks questions that are essential to advancing DBER and broadening its impact on undergraduate science teaching and learning. The book provides empirical research on undergraduate teaching and learning in the sciences, explores the extent to which this research currently influences undergraduate instruction, and identifies the intellectual and material resources required to further develop DBER.

*Discipline-Based Education Research* provides guidance for future DBER research. In addition, the findings and recommendations of this report may invite, if not assist, post-secondary institutions to increase interest and research activity in DBER and improve its quality and usefulness across all natural science disciplines, as well as guide instruction and assessment across natural science courses to improve student learning. The book brings greater focus to issues of student attrition in the natural sciences that are related to the quality of instruction. *Discipline-Based Education Research* will be of interest to educators, policy makers, researchers, scholars, decision makers in universities, government agencies, curriculum developers, research sponsors, and education advocacy groups.

**From reader reviews:**

**Daniel Downey:**

Inside other case, little folks like to read book Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering. You can choose the best book if you want reading a book. Given that we know about how is important a book Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering. You can add understanding and of course you can around the world by just a book. Absolutely right, because from book you can recognize everything! From your country until eventually foreign or abroad you will end up known. About simple thing until wonderful thing it is possible to know that. In this era, we can easily open a book or perhaps searching by internet unit. It is called e-book. You may use it when you feel bored to go to the library. Let's learn.

How individuals to be smart in getting any information nowadays? Of course the answer is reading a book. Studying a book can help folks out of this uncertainty Information specially this Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering book because book offers you rich facts and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it you know.

**Jason Probst:**

The event that you get from Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering could be the more deep you rooting the information that hide inside words the more you get interested in reading it. It doesn't mean that this book is hard to recognise but Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering giving you enjoyment feeling of reading. The writer conveys their point in a number of way that can be understood by anyone who read the item because the author of this e-book is well-known enough. That book also makes your current vocabulary increase well. Making it easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this particular Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering instantly.
