Physics and Chemistry of the Solar System (International Geophysics)

John S. Lewis

Physics and Chemistry of the Solar System (International Geophysics) John S. Lewis

Physics and Chemistry of the Solar System, 2nd Edition, is a comprehensive survey of the planetary physics and physical chemistry of our own solar system. It covers current research in these areas and the planetary sciences that have benefited from both earth-based and spacecraft-based experimentation.

These experiments form the basis of this encyclopedic reference, which skillfully fuses synthesis and explanation. Detailed chapters review each of the major planetary bodies as well as asteroids, comets, and other small orbitals. Astronomers, physicists, and planetary scientists can use this state-of-the-art book for both research and teaching.

This Second Edition features extensive new material, including expanded treatment of new meteorite classes, spacecraft findings from Mars Pathfinder through Mars Odyssey 2001, recent reflections on brown dwarfs, and descriptions of planned NASA, ESA, and Japanese planetary missions.

- * New edition features expanded treatment of new meteorite classes, the latest spacecraft findings from Mars, information about 100+ new discoveries of planets and stars, planned lunar and planetary missions, more end-of-chapter exercises, and more
- * Includes extensive new material and is amply illustrated throughout
- * Reviews each major planetary body, asteroids, comets, and other small orbitals

From reader reviews:

Florence Lentz:

Do you have something that suits you such as book? The publication lovers usually prefer to opt for book like comic, quick story and the biggest one is novel. Now, why not trying Physics and Chemistry of the Solar System (International Geophysics) that give your fun preference will be satisfied simply by reading this book. Reading routine all over the world can be said as the means for people to know world a great deal better than how they react towards the world. It can't be explained constantly that reading routine only for the geeky person but for all of you who wants to end up being success person. So, for all of you who want to start looking at as your good habit, you could pick Physics and Chemistry of the Solar System (International Geophysics) become your personal starter.

Ruby Mejia:

Beside that Physics and Chemistry of the Solar System (International Geophysics) in your phone, it may give you a way to get more close to the new knowledge or details. The information and the knowledge you might got here is fresh from the oven so don't end up being worry if you feel like an aged people live in narrow town. It is good thing to have Physics and Chemistry of the Solar System (International Geophysics) because this book offers to you readable information. Do you oftentimes have book but you rarely get what it's interesting features of. Oh come on, that will not end up to happen if you have this with your hand. The Enjoyable blend here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss the item? Find this book and read it from today!

John Herrera:

As we know that book is essential thing to add our understanding for everything. By a guide we can know everything we would like. A book is a range of written, printed, illustrated or even blank sheet. Every year was exactly added. This publication Physics and Chemistry of the Solar System (International Geophysics) was filled in relation to science. Spend your free time to add your knowledge about your scientific research competence. Some people has several feel when they reading a new book. If you know how big benefit of a book, you can feel enjoy to read a reserve. In the modern era like right now, many ways to get book that you wanted.

James Pitts:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is written or printed or highlighted from each source this filled update of news. On this modern era like now, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just looking for the Physics and Chemistry of the Solar System (International Geophysics) when you desired

it?
