Aquaponic Gardening At Home: Including a Do It Yourself Step By Step Guide to Raising Vegetables and Fish Together! Francis Soza

What is aquaponic gardening, one may want to ask? Well, Aquaponic gardening is the combination of aquaculture (fish farming) with hydroponics (growing of plants with water in gravel, liquid or sand without the use of soil).

The fish and the plants work together in a system that constantly recycles its own water. They have a symbiotic relationship. The plants use the effluents produced by fish as food. In return, the plants purify water for the aquatic animals.

Aquaponic gardening has become a growing trend over the last ten years as it helps to allow families to create a sustainable environment. This form of gardening was born out of necessity for some challenges based on issues with traditional soil centered gardening that requires more space and energy.

Get a copy of this book now and get access to all the details on how you can start taking the benefits of setting up yourself one of these kind of garden and grow your own vegetables including also fish farming if you like!
