Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (World Bank Studies)

Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (World Bank Studies)

The Federal Government of Nigeria has adopted an ambitious strategy to make Nigeria the world's 20th largest economy by 2020. Sustaining such a pace of growth will entail rapid expansion of activity in key carbon-emitting sectors of the economy. In the absence of policies to accompany economic growth with a reduced carbon footprint, emission of greenhouse gases would more than double in the next two decades.

By consolidating and synthesizing the results of the sector-specific, in-depth analyses, volume 1 of this effort found options for Nigeria to achieve the development objectives of Vision 20:2020 and beyond, but stabilizing emissions at 2010 levels, and with domestic benefits in the order of 2 percent of GDP. The present study, volume 2, is a collection of the technical reports on the four sectors of inquiry—agriculture and land use, oil and gas, power, and transport—that informed the preparation of the first volume.

For agriculture and land use, the Government has set ambitious targets for increasing the domestic agricultural production six-fold by 2020. The study analyzes the mitigation potential of the agricultural sector within the constraint of meeting these growth targets. Benefits include more productive and climate-resilient agriculture.

For the oil and gas sector, the analysis evaluates how the country can continue to grow the oil and gas industry, making better use of Nigeria's gas resources, at the same time reducing the sector's carbon footprint.

The analysis of the power sector shows how the country can expand power generation and broaden access to electricity while reducing the associated emissions. This low-carbon scenario would enable Nigeria to achieve the same long-term development objectives, at lower overall cost through a more diversified mix of generation sources with a more balanced supply across regions.

Finally, this analysis assesses the expected growth in CO₂ emissions from on-road transport under a normal business development scenario up to the year 2035 and identifies policy and other mitigation actions at national and local levels that would reduce this growth, resulting in fuel economies, better air quality, and reduced congestion.

Each sectoral analysis outlines several actions that the Nigerian Government could undertake to facilitate the transition to a low-carbon economy.

From reader reviews:

James Lapham:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite guide and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (World Bank Studies). Try to make book Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (World Bank Studies) as your buddy. It means that it can to get your friend when you experience alone and beside associated with course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you far more confidence because you can know every little thing by the book. So , let's make new experience along with knowledge with this book.

Charles English:

The knowledge that you get from Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (World Bank Studies) will be the more deep you excavating the information that hide in the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to know but Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (World Bank Studies) giving you enjoyment feeling of reading. The writer conveys their point in particular way that can be understood by simply anyone who read the idea because the author of this guide is well-known enough. This book also makes your own personal vocabulary increase well. Making it easy to understand then can go along, both in printed or e-book style are available. We advise you for having this particular Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (World Bank Studies) instantly.

James Pierce:

People live in this new time of lifestyle always aim to and must have the time or they will get lot of stress from both lifestyle and work. So , whenever we ask do people have extra time, we will say absolutely indeed. People is human not just a robot. Then we inquire again, what kind of activity have you got when the spare time coming to anyone of course your answer can unlimited right. Then do you try this one, reading publications. It can be your alternative with spending your spare time, the book you have read is actually Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (World Bank Studies).

Samuel Freeman:

As we know that book is important thing to add our knowledge for everything. By a e-book we can know everything we wish. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This reserve Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (World Bank Studies) was filled concerning science. Spend your extra time to add your knowledge about your scientific research competence. Some people has several feel when they reading a book. If you know how big selling point of a book, you can truly feel enjoy to read a reserve. In the modern era like at this

point, many ways to get book you wanted.
