Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence)

Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence)

We describe in this book, new methods and applications of hybrid intelligent systems using soft computing techniques. Soft Computing (SC) consists of several intelligent computing paradigms, including fuzzy logic, neural networks, and evolutionary algorithms, which can be used to produce powerful hybrid intelligent systems. The book is organized in five main parts, which contain a group of papers around a similar subject. The first part consists of papers with the main theme of intelligent control, which are basically papers that use hybrid systems to solve particular problems of control. The second part contains papers with the main theme of pattern recognition, which are basically papers using soft computing techniques for achieving pattern recognition in different applications. The third part contains papers with the themes of intelligent agents and social systems, which are papers that apply the ideas of agents and social behavior to solve real-world problems. The fourth part contains papers that deal with the hardware implementation of intelligent systems for solving particular problems. The fifth part contains papers that deal with modeling, simulation and optimization for real-world applications.

From reader reviews:

Maurice Henkel:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to typically the Mall. How about open as well as read a book called Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence)? Maybe it is to become best activity for you. You recognize beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with its opinion or you have various other opinion?

Bertha Davis:

Do you certainly one of people who can't read pleasurable if the sentence chained inside straightway, hold on guys that aren't like that. This Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) book is readable through you who hate those straight word style. You will find the facts here are arrange for enjoyable reading experience without leaving possibly decrease the knowledge that want to supply to you. The writer of Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) content conveys the thought easily to understand by most people. The printed and e-book are not different in the information but it just different such as it. So , do you continue to thinking Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) is not loveable to be your top collection reading book?

George Hyler:

Your reading sixth sense will not betray a person, why because this Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) publication written by well-known writer who knows well how to make book which can be understand by anyone who also read the book. Written inside good manner for you, still dripping wet every ideas and composing skill only for eliminate your own hunger then you still hesitation Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) as good book not simply by the cover but also by content. This is one publication that can break don't assess book by its include, so do you still needing one more sixth sense to pick that!? Oh come on your reading sixth sense already alerted you so why you have to listening to one more sixth sense.

Christopher Evan:

Many people said that they feel bored when they reading a guide. They are directly felt it when they get a half elements of the book. You can choose the particular book Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) to make your current reading is interesting. Your own personal skill of reading ability is developing when you like reading. Try to choose very simple book to make you enjoy to learn it and mingle the sensation about book and reading through especially. It is to be 1st opinion for you to like to wide open a book and learn it. Beside that the e-book Soft Computing for Hybrid

Intelligent Systems (Studies in Computational Intelligence) can to be your brand-new friend when you're truly feel alone and confuse in doing what must you're doing of the time.
