"Through the frame of positive psychology, Wade and Jones solidify a next step in conceptualization and practice of supervision. This expansive view of historical, narrative, literary, and theoretical approaches is a significant addition to the supervision literature."

**Carol Falender, PhD, University of California, Los Angeles**

"For many of us in mental health fields our "training" in supervision occurred on the job. We mirrored the examples of positive supervision we experienced or tried to avoid the pitfalls we associated with negative supervision experiences. But being a competent and proficient supervisor is far more than emulation or avoidance of past experience. It is a vital aspect of our jobs and requires a pedagogical approach steeped in best practices and evidence. Strength Based Clinical Supervision offers a comprehensive approach to providing sound clinical supervision and should be part of any training program for clinicians who will one day supervise, mentor, or instruct anyone entering the field of mental health services."

**Carrie Fleider, MSW, LISW-S, Assistant Director for Training, Counseling and Consultation Services, The Ohio State University**
