Information Systems Theory: Explaining and Predicting Our Digital Society, Vol. 1: 28 (Integrated Series in Information Systems)

Information Systems Theory: Explaining and Predicting Our Digital Society, Vol. 1: 28 (Integrated Series in Information Systems)

Information Systems Theory: Explaining and Predicting Our Digital Society, Vol. 1: 28 (Integrated Series in Information Systems)

The overall mission of this book is to provide a comprehensive understanding and coverage of the various theories and models used in IS research. Specifically, it aims to focus on the following key objectives:

- To describe the various theories and models applicable to studying IS/IT management issues.
- To outline and describe, for each of the various theories and models, independent and dependent constructs, reference discipline/originating area, originating author(s), seminal articles, level of analysis (i.e. firm, individual, industry) and links with other theories.
- To provide a critical review/meta-analysis of IS/IT management articles that have used a particular theory/model.
- To discuss how a theory can be used to better understand how information systems can be effectively deployed in today's digital world.

This book contributes to our understanding of a number of theories and models. The theoretical contribution of this book is that it analyzes and synthesizes the relevant literature in order to enhance knowledge of IS theories and models from various perspectives. To cater to the information needs of a diverse spectrum of readers, this book is structured into two volumes, with each volume further broken down into two sections.

The first section of Volume 1 presents detailed descriptions of a set of theories centered around the IS lifecycle, including the Success Model, Technology Acceptance Model, User Resistance Theories, and four others. The second section of Volume 1 contains strategic and economic theories, including a Resource-Based View, Theory of Slack Resources, Portfolio Theory, Discrepancy Theory Models, and eleven others.

The first section of Volume 2 concerns socio-psychological theories. These include Personal Construct Theory, Psychological Ownership, Transactive Memory, Language-Action Approach, and nine others. The second section of Volume 2 deals with methodological theories, including Critical Realism, Grounded Theory, Narrative Inquiry, Work System Method, and four others.

Together, these theories provide a rich tapestry of knowledge around the use of theory in IS research. Since most of these theories are from contributing disciplines, they provide a window into the world of external thought leadership.

Ryan Fox:

Information Systems Theory: Explaining and Predicting Our Digital Society, Vol. 1: 28 (Integrated Series in Information Systems) can be one of your beginner books that are good idea. All of us recommend that straight away because this reserve has good vocabulary which could increase your knowledge in vocab, easy to understand, bit entertaining but delivering the information. The writer giving his/her effort to put every word into enjoyment arrangement in writing Information Systems Theory: Explaining and Predicting Our Digital Society, Vol. 1: 28 (Integrated Series in Information Systems) although doesn't forget the main stage, giving the reader the hottest and based confirm resource information that maybe you can be one among it. This great information can certainly drawn you into fresh stage of crucial contemplating.

Nancy Herman:

Do you really one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Make an effort to pick one book that you just dont know the inside because don't ascertain book by its cover may doesn't work here is difficult job because you are scared that the inside maybe not while fantastic as in the outside appear likes. Maybe you answer may be Information Systems Theory: Explaining and Predicting Our Digital Society, Vol. 1: 28 (Integrated Series in Information Systems) why because the excellent cover that make you consider with regards to the content will not disappoint anyone. The inside or content is actually fantastic as the outside or perhaps cover. Your reading sixth sense will directly make suggestions to pick up this book.

Robert Marshall:

In this period globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher which print many kinds of book. Often the book that recommended to you personally is Information Systems Theory: Explaining and Predicting Our Digital Society, Vol. 1: 28 (Integrated Series in Information Systems) this book consist a lot of the information in the condition of this world now. This particular book was represented how can the world has grown up. The dialect styles that writer require to explain it is easy to understand. The particular writer made some analysis when he makes this book. Honestly, that is why this book suitable all of you.

James Harris:

Within this era which is the greater man or who has ability to do something more are more precious than other. Do you want to become certainly one of it? It is just simple way to have that. What you are related is just spending your time little but quite enough to possess a look at some books. One of many books in the top record in your reading list is usually Information Systems Theory: Explaining and Predicting Our Digital

Society, Vol. 1: 28 (Integrated Series in Information Systems). This book which can be qualified as The Hungry Hills can get you closer in getting precious person. By looking upwards and review this guide you can get many advantages.
