Postharvest Technology and Food Process Engineering Amalendu Chakraverty, R. Paul Singh

Cereals, legumes, oilseeds, fruits, and vegetables are the most important food crops in the world, with cereal grains contributing the bulk of food calories and proteins worldwide. Generally, the supply of grains and other food can be enhanced by increasing production and by reducing postharvest losses. While food production has increased significantly over the last few decades, minimizing huge postharvest losses as well as utilizing their by-products/wastes is the optimal way for a country to become self-sufficient in food.

Postharvest Technology and Food Process Engineering combines these two subject areas as it covers both the primary processing of cereals, pulses, fruits, and vegetables and utilization of by-products/biomass.

This book covers postharvest food preservation and processing methods, with an emphasis on grains. It is divided into five parts:

- Grain-Properties, Drying and Dryers
- Grain Storage
- Parboiling and Milling
- By-Products/Biomass Utilization
- Food Process Engineering

The text covers grain structure and composition, psychrometry, the theory and methods of grain drying, and design, testing, specification and selection of grain dryers. It describes processes such as parboiling of grain, hydrothermal treatment of grain, and milling of rice and other grains and pulses. The text also addresses biomass utilization and conversion technologies for energy, chemicals, food, and feed. The final section on food process engineering examines postharvest management including cooling, and packaging, and discusses preservation and processing, factors that affect deterioration, and various industrial preservation methods of fruits and vegetables. It also provides an overview of food chemistry and covers food engineering operations, including fluid mechanics and heat transfer.

From reader reviews:

Lawrence Rector:

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite book and reading a reserve. Beside you can solve your condition; you can add your knowledge by the reserve entitled Postharvest Technology and Food Process Engineering. Try to make the book Postharvest Technology and Food Process Engineering as your friend. It means that it can being your friend when you sense alone and beside that course make you smarter than previously. Yeah, it is very fortunated to suit your needs. The book makes you far more confidence because you can know every thing by the book. So , we should make new experience in addition to knowledge with this book.

James Atkinson:

With other case, little individuals like to read book Postharvest Technology and Food Process Engineering. You can choose the best book if you'd prefer reading a book. As long as we know about how is important the book Postharvest Technology and Food Process Engineering. You can add expertise and of course you can around the world by just a book. Absolutely right, since from book you can learn everything! From your country until finally foreign or abroad you will end up known. About simple factor until wonderful thing you could know that. In this era, we are able to open a book as well as searching by internet unit. It is called e-book. You need to use it when you feel fed up to go to the library. Let's read.

Glenda Rogers:

Book is to be different for each and every grade. Book for children until eventually adult are different content. As it is known to us that book is very important for people. The book Postharvest Technology and Food Process Engineering seemed to be making you to know about other know-how and of course you can take more information. It is very advantages for you. The publication Postharvest Technology and Food Process Engineering is not only giving you more new information but also being your friend when you experience bored. You can spend your current spend time to read your guide. Try to make relationship with the book Postharvest Technology and Food Process Engineering. You never truly feel lose out for everything should you read some books.

Raymond Murray:

Do you one among people who can't read pleasurable if the sentence chained from the straightway, hold on guys this aren't like that. This Postharvest Technology and Food Process Engineering book is readable by you who hate the perfect word style. You will find the information here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to supply to you. The writer regarding Postharvest Technology and Food Process Engineering content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the information but it just different such as it. So , do you continue to thinking Postharvest Technology and Food Process Engineering is not loveable to be your

top checklist reading book?
