Treatise on Materials Science and Technology, Volume 19: Experimental Methods, Part A covers the methods of materials experimentation and testing. The book discusses the measurement of residual stresses by x-ray diffraction techniques; the investigation of composition variations by diffraction; and the use of Mössbauer spectroscopy in materials science. The text also describes photoluminescence techniques for studies of composition and defects in semiconductors; and materials production by high-rate sputter deposition. Graduate students in the field of materials science, laboratory scientists, and materials engineers will find the book invaluable.
